FIG. 5

This cross-sectional view shows a device assembly. A central cavity, labeled 270, is formed within a substrate. The cavity has a rounded front end and a flat back end. The substrate is composed of several layers, including a top layer 256 and a bottom layer 12. A central layer 98 is also visible. On the left side, a component 66 is shown, and a reference numeral 2 points to the outer edge. On the right side, a component 274 is shown, and a reference numeral 287 points to the top surface. A reference numeral 289 points to the right side of the assembly. A reference numeral 268 points to a small feature on the top surface of the right side. A reference numeral 291 points to the top surface of the central cavity. A reference numeral 272 points to the bottom surface of the central cavity. A reference numeral 90 points to the bottom surface of the substrate. A reference numeral 50 points to a small feature on the left side of the central cavity. A reference numeral 98 points to the central layer of the substrate.
